

JavaScript Day 3 (Prototypes & OOP) – Practice Sheet

40 Coding Questions (Easy → Medium → Hard)

Section A: Objects & Methods (1–10)

Q1

Ek `student` object banao jisme:

- name
- age
- city

Store ho.

Q2

Upar wale object ka name print karo.

Q3

Object me `greet()` method add karo jo print kare:

Hello I am Ram

Q4

Object me `isAdult()` method banao jo age check kare.

Q5

Object ki sabhi keys print karo.

Q6

Object ki sabhi values print karo.

Q7

Check karo ki object me `email` property hai ya nahi.

Q8

Object me dynamically property add karo.

```
student.course = "MERN";
```

Q9

Object se age property delete karo.

Q10

Ek object ka clone banao.

Section B: this Keyword (11–15)

Q11

Ek object banao jisme `showName()` method ho aur `this.name` print kare.

Q12

Ek object me:

```
name = "Ram"
```

store karo aur method se uppercase print karo.

Q13

Object me do methods banao:

```
deposit()
```

```
withdraw()
```

Aur balance update karo.

Q14

Predict Output

```
const user = {  
  name:"Ram",  
  show(){  
    console.log(this.name);  
  }  
};
```

```
user.show();
```

Q15

Predict Output

```
const user = {  
  name:"Ram",  
  show: () => {  
    console.log(this.name);  
  }  
};
```

```
user.show();
```

Section C: Constructor Functions (16–20)

Q16

Student constructor function banao.

Parameters:

name
age

Q17

3 student objects create karo constructor se.

Q18

Constructor function me `greet()` method add karo.

Q19

Predict Output

```
function User(name){  
  this.name=name;  
}
```

```
const u1=new User("Ram");
```

```
console.log(u1.name);
```

Q20

Car constructor function banao.

Properties:

brand
price

Section D: Prototype (21–28)

Q21

Student constructor banao aur prototype me `greet()` method add karo.

Q22

Check karo:

`obj.__proto__ === Student.prototype`

Q23

Prototype me `isAdult()` method add karo.

Q24

Predict Output

```
function User(){}
```

```
User.prototype.sayHi=function(){  
  console.log("Hi");  
}
```

```
const u1=new User();
```

```
u1.sayHi();
```

Q25

Prototype me **course** property add karo.

Q26

Check karo:

```
u1.hasOwnProperty("course")
```

Output kya hoga?

Q27

Check karo:

```
"course" in u1
```

Output kya hoga?

Q28

Prototype chain draw karo:

```
const arr=[]
```

Section E: Object.create() (29–32)

Q29

Animal object banao.

Method:

```
eat()
```

Q30

Animal se dog object create karo using:

Object.create()

Q31

Dog me `bark()` method add karo.

Q32

Predict Output

```
const animal={  
  eat(){  
    console.log("Eating");  
  }  
};
```

```
const dog=Object.create(animal);
```

```
dog.eat();
```

Section F: Classes (33–36)

Q33

Student class banao.

Properties:

name

age

Q34

Class me `greet()` method add karo.

Q35

Class me `isAdult()` method add karo.

Q36

3 objects create karo class se.

Section G: Inheritance (37–40)

Q37

Animal class banao.

Method:

`eat()`

Q38

Dog class banao jo Animal ko inherit kare.

Q39

Dog class me `bark()` method add karo.

Q40

Create:

```
const d = new Dog();
```

Call:

```
d.eat();
```

```
d.bark();
```

Expected Output explain karo.
